

A collage of three images: on the left, two workers in safety gear walking away from the camera at night near industrial structures; in the center, a smiling woman with glasses and a lanyard; on the right, a close-up of a worker in an orange safety vest and helmet.

What is Becklar Workforce Safety?

Welcome to Becklar Workforce Safety. Your company has invested in your safety and provided a solution that enhances your safety without getting in the way.

Becklar's Digital PPE was chosen by your organization to help ensure you're protected in real time, no matter where or how you work. By combining proactive safety tools like fall detection, emergency alerts, and check-in protocols, this solution offers an added layer of security when it matters most. This is a commitment to your well-being and a reflection of how much your safety truly matters.

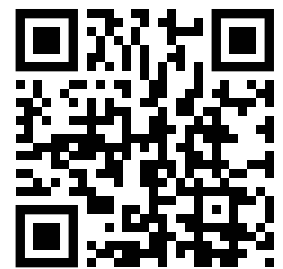

This technology is designed to bring you:

- **Peace of mind in every situation** – You can focus on your job knowing that if something goes wrong, help will be on the way—even if you're unable to call for it yourself.

- **Support when you need it most** – In an emergency, the system activates automatically to ensure your safety is never left to chance.
- **Privacy you can trust** – This is not a tracking system. Your location and data are never monitored or stored. Information is shared only in the event of an emergency.

Training will be provided on Becklar's safety solutions with the opportunity to address any questions or concerns.

FAQ

Q: Is my company tracking my location?

A: No. Your location is never tracked. It is only shared in the event of an emergency.

Q: Is my personal data being accessed or stored by my company or Becklar?

A: No. None of your health data, or online activities, are being stored.

Q: Will this affect the battery life of my phone?

A: WorkerSafety Pro will use about 10% of a device's battery on average.

Q: Is this going to disrupt my ability to do my job?

A: This is a solution meant to run in the background. It enables you to remain focused on your job and worry less about your safety

Q: Will this app work on any phone or smart watch?

A: WorkerSafety Pro is available on iPhone, Android , and Apple Watches. However, the operating system on your phone must be the current OS or within the last 2 releases.

Q: How much data will this use on my data plan per day?

A: Less data than sending a photo.

Q: How will I know that I triggered an alarm?

A: Your phone will vibrate, flash, and make noise.

Q: How do I cancel a false alarm?

A: Simply open your app and tap "I'm OK"

Q: Who is notified when there is an emergency?

A: Your organization's emergency contacts are notified via call, text, and email during an emergency. If your company has chosen Becklar's Monitoring services, emergency services may be dispatched.

Q: What happens when I leave cell coverage?

A: If connected to a satellite data plan, WorkerSafety Pro will operate as normal. When a user leaves cell coverage immediate notification is sent to the user, letting them know that connection is lost and they will need to return to connectivity to continue using WorkerSafety Pro. WorkerSafety Pro does provide check-in systems that can be configured by a user prior to leaving connectivity.
